# Moving towards 2030 and 2050 with hydrogen

The energy transition requires new forms of infrastructure and intelligent use of existing networks. Gasunie wants to invest in new infrastructure for renewable gases such as hydrogen.

## 2016 Paris Agreement:

Global warming set at a max. 2°C. This requires CO<sub>2</sub>-reduction in the Netherlands of:

- 40-50% in 2030
- 85-100% in 2050

Hydrogen as a fuel and as a raw material can help to achieve CO<sub>2</sub>-reduction targets.
